Office Action Summary

Application No.

10/044,098

Applicant(s)

DECKER, RONALD E.

Examiner

Hanh V. Tran

Art Unit

3637

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 April 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-41 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-41 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 12 April 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☒ Interview Summary (PTO-413)
Paper No(s)/Mail Date 3/23/2004
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

1. This is a Non-Final Office action from the examiner in charge of this application in response to applicant's amendment dated 4/12/2004.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 1-7, 9-12, 19-23, 25-29, 34-35, 37-38, and 40-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paradigm Industries, Inc., Photographs of a stand first offered for sale approximately September of 2001 (Paradigm Stand) in view of German 2,601,223 to Peddinghaus.

Paradigm Stand discloses a stand comprising a base, a support member interconnected to the base, a support sleeve having at least a top surface and in slidable telescopic cooperation with the support member, a lift platform associated with the top surface of the support sleeve, a coupling mechanism slidably interconnected to the support sleeve, an actuating lever

Art Unit: 3637

interconnected to the coupling mechanism, a clevis interconnected to the base, at least one link member pivotally interconnected to the clevis and the actuating lever, where the stand can be selectively positioned between a first position of rest and a second position of use. The different being that Paradigm Stand does not disclose a self-lubricating member, said self-lubricating member be either a sleeve or at least one strip, and a seal member.

Peddinghaus teaches the idea of providing a plurality of telescoping members with a self-lubricating member, which can be either a sleeve or a strip in order to facilitate relative adjustment of the telescoping members. Therefore, it would have been obvious to modify the structure of Paradigm Stand by providing a self-lubricating member in the form of a sleeve or a strip in order to facilitate relative adjustment of the telescoping members, as taught by Peddinghaus, since both teach alternate conventional telescoping members structures, thereby providing structure as claimed. In regard to a seal member, it would have been obvious and well within the level of one skill in the art to provide the stand of Paradigm Stand with a seal member in order to prevent dirt from entering the telescoping members.

5. Claims 8, 24, 36, and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paradigm Stand, as modified, as applied to claims 1, 19, 34, and 38 above, and further in view of USP 5,769,396 to Tischendorf.

Paradigm Stand, as modified, discloses all the elements as discussed above except for the clevis is removable.

Tischendorf discloses a stand comprising a base, a lift platform, an actuating lever, and a removable clevis; wherein the removable clevis allows a more compact stand in the storage configuration. Therefore, it would have been obvious to modify the structure of Paradigm Stand,

Art Unit: 3637

as modified, by having the clevis being removable in order to provide a more compact stand in the storage configuration, as taught by Tischendorf, since both teach alternate conventional stand structure, used for the same intended purpose, thereby providing structure as claimed.

6. Claims 13, 16, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paradigm Stand in view of USP 5,769,396 to Tischendorf.

Paradigm Stand, as stated in paragraph #4 above, discloses all the elements recited in the above listed claims 13, 16, and 18, including the claimed limitation of the actuating lever operatively communicating with the support sleeve to allow the lift platform to be adjusted to a plurality of heights, i.e., the first height position of rest and the second height position of use. The different being that it does not disclose the clevis is removable.

Tischendorf discloses a stand comprising a base, a lift platform, an actuating lever, and a removable clevis; wherein the removable clevis allows a more compact stand in the storage configuration. Therefore, it would have been obvious to modify the structure of Paradigm Stand by having the clevis being removable in order to provide a more compact stand in the storage configuration, as taught by Tischendorf, since both teach alternate conventional stand structure, used for the same intended purpose, thereby providing structure as claimed.

7. Claims 14-15, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paradigm Stand, as modified, as applied to claim 13 above, and further in view of German 2,601,223 to Peddinghaus.

Paradigm Stand, as modified, discloses all the elements as discussed above except for a self-lubricating member, said self-lubricating member be either a sleeve or at least one strip.

Peddinghaus teaches the idea of providing a plurality of telescoping members with a self-lubricating member, which can be either a sleeve or a strip in order to facilitate relative adjustment of the telescoping members. Therefore, it would have been obvious to modify the structure of Paradigm Stand, as modified, by providing a self-lubricating member in the form of a sleeve or a strip in order to facilitate relative adjustment of the telescoping members, as taught by Peddinghaus, since both teach alternate conventional telescoping members structures, thereby providing structure as claimed.

8. Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over Paradigm Stand in view of Moose Aluminum Lift Stand, year 2002 model.

Paradigm Stand, as stated in paragraph #4 above, discloses all the elements recited in claim 30 including the claimed limitation of the support sleeve and the lift platform can be adjusted to a plurality of heights, i.e., the first height position of rest and the second height position of use. The different being that Paradigm Stand does not disclose the coupling mechanism can be selectively interconnected along the support sleeve.

However, Moose Aluminum Lift Stand, year 2002 model teaches the idea of providing a lift stand, which can provide the support sleeve and the lift platform with two height choices for low dual sport bikes and high MX bikes. Therefore, it would have been obvious to modify the structure of Paradigm Stand by providing the support sleeve and the lift platform with two height choices for various bikes' heights, as taught by Moose Aluminum Lift Stand, year 2002 model, since both teach alternate conventional lift stand structure, used for the same intended purpose, thereby providing structure as claimed. Further, in regard to the coupling mechanism can be selectively interconnected along the support sleeve (being separable from the support sleeve and

Art Unit: 3637

adjustable along the support sleeve), instead of being fixed at one position as disclosed in Paradigm Stand, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have the coupling mechanism being selectively interconnected along the support sleeve, since it has been held that constructing a formerly integral structure in various elements involves only routine skill in the art. *Nerwin v. Erlichman*, 168 USPQ 177, 179, and since it has been held that the provision of adjustability, where needed, involves only routine skill in the art. *In re Stevens*, 101 USPQ 284 (CCPA 1954).

9. Claims 31-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paradigm Stand, as modified, as applied to claim 30 above, and further in view of German 2,601,223 to Peddinghaus.

Paradigm Stand, as modified, discloses all the elements as discussed above except for a self-lubricating member, said self-lubricating member be either a sleeve or at least one strip.

Peddinghaus teaches the idea of providing a plurality of telescoping members with a self-lubricating member, which can be either a sleeve or a strip in order to facilitate relative adjustment of the telescoping members. Therefore, it would have been obvious to modify the structure of Paradigm Stand, as modified, by providing a self-lubricating member in the form of a sleeve or a strip in order to facilitate relative adjustment of the telescoping members, as taught by Peddinghaus, since both teach alternate conventional telescoping members structures, thereby providing structure as claimed.

Response to Arguments

10. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
11. In response to applicant's argument regarding Paradigm Stand is NOT prior art under 102(a) since the inventor of the above-referenced application is the President of Paradigm Industries, Inc. and thus, the cited reference was not known or used by "others", the examiner take the position that since the device was offered for sale to the public approximately September 2001 (which is prior to the filing of the instant application), the device is prior art under 102(a) by at least as being known by "others".

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kelm et al, Klein et al, Lisi, Goguen, and Jane Launes all show structures similar to various elements of applicant's disclosure.
13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hanh V. Tran whose telephone number is (703) 308-6302. The examiner can normally be reached on Monday-Thursday, and alternate Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (703) 308-2486. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
